PRELIMINARY PROGRAM

AGENDA

Join us

The 1st Jordi Mancebo Plug Physiology Symposium will take place in Barcelona on September 28-30 2023. We will gather to remember and celebrate the method that Jordi taught us to discuss research: start from original data, be open to learn something new, follow the energy of the younger members. The format will be a 200-seat room where original research studies will be presented mixed with (few) expert presentations on respiratory physiology. Support for abstract presenters, younger fellows, people from far and low income countries will tentatively be provided.
